This is deemed a formal declaration with regards to the firm Macroansy®'s \$BEEPower Coin's, 'Peer to Peer Trade Fee'.

Trade fee on every successful 'Coin Buy' at DApp MAS Exchange© = Coin Buy Value \* 3%.

This fee is deducted while the Coin Buyer makes the ETH payment, and the remaining amount is credited to the Coin Seller's wallet Account. Coin Buyer gets the full amount of Coins for his payment.

This has been fixed after a crucial analysis of the trade off between MAS SIGN© and Treasure Hunt Sell-Buy. Higher % could reduce the min number of coins offered for sell during an online agreement sign, but would increase the cost on Treasure Hunt trade and vice versa. We have fixed 3% as the optimum fee at this moment. While the Market Coin Price increases through time, this trade fee % could be reduced.

The basis is that the min fee value obtained should be atleast equal to 0.001 ETH. Less than this value could result in transaction failure in the Blockchain process. All the Sell-Buy processes are done directly on blockchain and not done on a web-interface.

This fee is not applicable to Coins bought directly from the Project by clicking the 'Direct Buy ICO' menu link at DApp MAS Exchange©.
