First issue: 07 June 2019. Updated: 11 June 2019.

This General Declaration is deemed a formal declaration with regards to the firm Macroansy®'s \$BEEPower Coin's 'Sell-Buy arte-fact sale' speculation window base increase to '10 x' after 6 millions coin Sell out, which would result in the Bench Mark prices as shown below. This declaration is irrevocable.

This promise is planned for giving value to early investors who did believe on this good project. Further '10 x base' increase to speculation window is considered fair for this bullish project.

*This declaration is also subject to actual demand of this speculation from the public and would be decided based on the public demand and general consensus on public interest at that moment of time.*

For the next series of coin sale if any, will have a Market Coin Price as the 'Max Bench Mark Price' at that moment of time and the Bench Mark prices would be deployed based to the Market Coin Price. This would be decided during the next series sale opening. Most probably the next series sale would be after the basic project commissioning.

The term 'Coin' (case insensitive & singular or plural) refer to \$BEEPower coin, the crypto digital token on Ethereum Block Chain.

The following Bench Mark Prices and Market Coin Price would be officially deployed after 6 million coins sell out. This declaration is irrevocable.

Please note that One \$BEEPower Coin = 1000 Coin parts, and is represented in decimals as 1.000

Min Bench Mark Price (LP) = 0.25 Ether Per \$BEEPower Coin.

Max Bench Mark Price (HP) = 0.5 Ether Per \$BEEPower Coin.

Market Coin Price = 0.501 Ether per \$BEEPower Coin.

LP and HP are those 'between and inclusive speculation prices' within which a Seller offers a Coin Sale for his urgent cash back to ETH. This lesser than Market Coin Price Sell offer is a profit to a Buyer. Seller is deemed to lose value as like paying an interest on his urgent personal Gold loan to a Buyer. This is the fundamental Coin trade Strategy with MAS©.

Market Coin Price is deployed by MAS© as per Project Performance and the value is enhanced with a bullish speculation factor, deemed fair and acceptable to the public. The project directly sells coin at Market Coin Price and this price does not come under public speculative trade.
